## WORKING

## TRANSPORT

The K-TC 460 is designed to work in conjunction with the entire range of komplet crushing and screening equipment. Using conveyors means increased stockpile capacity and reduces on-site material handling.

Pair your crusher, screen, or shredder with a tracked conveyor to maximize production and minimizing operating costs.

For convenience and to keep shipping costs low, komplet conveyors can be transported in a 20ft container.

## FEATURES AND BENEFITS

- For maximum mobility, tracks allow the stacker to be easily moved on its own.
- Fast on-site setup time (5 minutes).
- Containerised and transport friendly.
- Move more material in a day.
- Create better stockpiles.
- Reduced loader dependency.
- Get the freedom to run with a skinny crew and a lower investment.
- Eliminate the Wheel Loader and Improve your Operating Costs.
